Sample Test Paper

1. A package without body is possible.(T/F)ans:T

2. Subprograms have equal scope as variables.(T/F)

3. Can a cursor be closed for two times(T/F)ans:F

4. Transaction function can be used in trigger(T/F)ans:F

5. DDL can be used in trigger(T/F)ans:T

6. A trigger name can have the same name as that of its base table name(T/F)ans:T

7. In a PL/SQL block a variable and a table name both are same then which will get highest precedence.

8. Is PL/SQL reserved words can be used in SQL Ans:It can be used with quotation.

9. How to write a single quote in SQL
i)"" ii)''' iii)"

10. Can a labeled go to statement goto the inner loop(T/F)ans:F

11. Which are the mandatory parts of PL/SQL procedure.

12. SQL%ISOPEN for implicit cursor is always evaluateto false(T/F)ans:T

13. Any variable not declared in the declare part assigns value ......

14. For cursor %NOTFOUND and for PL/SQL NO_DATA_FOUND(exception)gives the same result.(T/F)ans:T

15. If exception occured in the exception then it will
i)raise in the same block
ii)raise in the outer block
iii)not raise in the same block

16. PMON command is used for_____

17. Select * from emp where emp_no=1;
If exist then dbms_output_putline(".....")
else dbms_output_putline("error")

end if;

what will be the output choices are there

18.   If for Update lock is absent then will there any error in the following statement

select * from emp;

choices are there.ans is there will no error

19.   Can a inbuilt exception be redifined by a user(T/F)ans:F

20.   var table.value%type;

var=5;

insert into table(value) values(var);

for var in reverse 4..6

loop

insert into table(value) values(var);

end loop;

insert into table(value) values(var);

i)56545

ii)56544(ans)

iii)56555

iv)65445

21.   can a function overloaded differed by

i)the no of parameters and its type only

ii)their return type

iii)

iv)

22.   Raise_application_error is used for.........

23.   In SQL SGA area the parser tree and exceptions are stored which are used for multiple applications(T/F)ans:F

24.   PRAGMA_EXCEPTION_INIT(mssge,code no)......

25.   exceptions are executed at

i)compile time

ii)runtime(ans)

26.   When a subprocedure will be declared within a procedure?

i)at the end of the declaration

ii).......

iii)....

27.   Record1 and record2 are declared.each record has two fields
with same datatypes.

i)Record1:=Record2;

ii)Record1.field1:=Record2.field1;

iii)Record1.field2:=Record2.field2;

a)only i is legal

b)only ii and iii are legal

c)all are legal

d)none is legal

28.   Trigger syntax declaration without the option for each row
is

legal(T/F)ans:T

29.   Tablespace contains physical data(T/F)ans:T

30.   Rowid is a pseudo column of every oracle table(T/F)

31.   Lpad and Rpad have default pad character is space(T/F)

32.   When %ROWCOUNT is 0 what will happen

i)NO_DAT_FOUND exception will raise

ii)%FOUND will be false
