DRUGS

EXERCISE-II

1. Fatty liver syndrome is due to:-
   (1) Infection by a virus
   (2) Intake of excessive fat
   (3) Intake of excessive alcohol
   (4) Intake of tobacco through chewing

2. Emphysema is due to intake of:-
   (1) Narcotics (2) Heroin
   (3) Smoking (4) Opiates

3. Tabacco chewing results in:-
   (1) Mouth cancer (2) Lung cancer
   (3) Bone cancer (4) Leukaemia

4. In drunk person, the part of brain to be affected first is:-
   (1) Cerebellum (2) Pons varolli
   (3) Medulla oblongata (4) Cerebrum

5. Opium is got from:-
   (1) Thea sinensis
   (2) coffea Arabica
   (3) Oryza sativa
   (4) Papaver somniferum

6. Organ which is most affected by alcohol is:-
   (1) Heart (2) Cerebrum
   (3) Liver (4) Cerebellum

7. Marijuana, Ganja and LSD are:-
   (1) Narcotics (2) Hallucinogens
   (3) Sitmulants (4) All the above

8. Caffeine, amphetamine and cocaine are:-
   (1) Sedative (2) Tranquillisers
   (3) Hallucinogens (4) Stimulants

9. Which is mental disorder:-
   (1) Tetanus (2) Neurosis
   (3) Drug dependence (4) Alcoholism

10. Effects of nicotine on human body include:-
    (1) Release of adrenaline and hence increased blood pressure and heart beat
    (2) Stimulation of nerve impulse and muscle relaxation
    (3) Decreased foetal growth
    (4) All the above

11. In alcoholics liver gets damaged as it:-
    (1) Accumulates excess of fats
    (2) Stores excess of glycogen
    (3) Secretes more bile
    (4) Has to detoxify alcohol
    (5)

12. LSD is obtained from:-
    (1) Cannabis (2) Claveceps
    (3) Fusarium (4) Nostoc

13. Addiction of tobacco is due to:-
    (1) Histamine (2) Nicotine
    (3) Cocaine (4) Caffeine

14. Which one is a hallucinogen:-
    (1) LSD (2) Heroin
    (3) Morphine (4) Cocaine

15. A factor responsible for cirrhosis of liver is:-
    (1) Vitamins (2) Fasts and oils
    (3) Alcoholism (4) Sugar

16. Which of the following drug taken with alcohol may have dangerous effects:-
    (1) Morphin (2) Opium
    (3) Aspirin (4) None

17. The drug that causes chronic psychosis and severe damage to C.N.S in :-
    (1) Hashish (2) Charas
    (3) Marijuana (4) LSD

18. The mildest stimulants is:-
    (1) Amphetamines (2) caffeine
    (3) Cocaine (4) Charas

19. Th stimulants present in tea, cocoa and cola drink:-
    (1) Cocaine (2) Tannin
    (3) Opium (4) Caffeine

20. The carcinogenic ingredient of tobacco smoke is:-
    (1) Nicotine
    (2) Polycyclic aromatic hydrocarbon
    (3) Carbon monoxide
    (4) Tar
    (5)

21. The drug which relieve intense pain are:-
    (1) Hallucinogens (2) Opiates
    (3) Stimulants (4) Sedative

22. Opium derivative is/are:-
    (1) Morphine (2) Codeine
    (3) Heroin (4) All the above

23. Which is not a mental disorder:-
(1) Gout (2) Epilepsy
(3) Neurosis (4) Psychosis

24. Tobacco smoke contain:-
(1) CO_2, tar, Nicotine
(2) Nicotine, CO, polycycline aromatic compound and tar
(3) Nicotine and CO
(4) Nicotine and tar

25. A useful drug that damage gastric mucosa, if taken along with alcohol is:-
(1) Antihistamine (2) Morphine
(3) Aspirin (4) Valium

26. Connabis sativa (Hemp) yields:-
(1) Bhang (2) Charas
(3) Ganja (4) All the above

27. Alcoholism leads to:-
(1) Amnesia (2) Lung-damage
(3) Cancer (4) None

28. Amphetamines are central nervous stimulants, bar-biturates are:-
(1) CNS-stimulants (2) No effect on CNS
(3) Hallucinogenic (4) CNS-deppresant

29. Addiction of smoking leads to:-
(1) Lung cancer (2) Bronchitis
(3) Emphysema (4) All the above

30. In the liver alcohol is converted into which toxic substance:-
(1) Formic acid (2) Acetaldehyde
(3) Nicotine (4) Urea

31. Which is related to tobacco addiction:-
(1) Gastric and duodenal ulcers
(2) Bronchitis
(3) Emphysema
(4) All the above

32. Effects of alcohol on human body includes:-
(1) Reduced blood sugar level
(2) Fatty liver syndrome
(3) Amnesia
(4) All the above
(5)

33. Most potent hallucinogenic drug is:-
(1) Charas (2) Bhang
(3) Hashish (4) LSD

34. Which one is a sedative drug:-
(1) Amphetamines (2) LSD
(3) Barbiturates (4) Bhang

35. Tobacco smking commonly produces:-
(1) Blood-cancer (2) Lung cancer
(3) Cancer of pancreas (4) Bone cancer

36. Opiates narcotics are:-
(1) Morphine, codein, heroin
(2) Morphine,barbiturates, caffeine
(3) Codein, heroin, cocaine
(4) Cocaine, caffeine, codein

37. Cocaine is derived from :-
(1) Erythroxylon coca
(2) Coffea Arabica
(3) Thea sinensis
(4) Cannabis sativa

38. The most highly addictive of the drugs is:-
(1) Heroin (2) LSD
(3) Alcohol (4) Barbiturates

39. Which is synthetic stimulant:-
(1) Cocaine (2) Amphitamine
(2) LSD (4) Mescaline

ANSWER KEY EXERCISE - II

Q.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
A.	3	3	1	4	4	3	2	4	2	4	1	2	2	1	3
Q.	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
A.	3	4	2	4	2	2	4	1	2	3	4	1	4	4	2
Q.	31	32	33	34	35	36	37	38	39						
A.	4	4	4	3	2	1	1	1	2
